DATA SCIENCE

THIS IS ME

I'm a data enthusiast based in Mumbai, who loves to explore the world through numbers and insights. I spend most of my time on my computer, creating visualizations and models that bring data to life. I have a passion for solving complex problems and finding innovative solutions.

I'm now working on computer vision models in the quality domain to detect material flaws, as well as in the safety domain to detect helmet safety, confine an area, and other interesting projects.

DATA VISUALIZATION

Projects I worked on

Netflix Data Analysis

Python | Tableau | Plotly

[Click here to see project](#)

Aqua Culture

Tableau | Microsoft Excel

[Click here to see project](#)

TN Covid Analysis

Tableau

WORK EXPERIENCE

- **Junior Computer Vision Engineer | Quantic**
 - October 2022 - present
 - Working on **Computer Vision, Jetson Nano, Yolo**
- **Machine Learning Consultant | Revca**
 - Feb 2022 - Sept 2022
 - Worked on implementing **Neural Networks**
